

Math Teacher (Spring 2026 Leave Replacement)

Boston University Academy is seeking a full-time math teacher for a four-month leave replacement position for spring 2026 (mid-February to mid-June). Primary responsibilities include teaching three sections of math: two Precalculus sections and one section of Algebraic Thinking & Coordinate Geometry: Integrated Math 1. Both courses utilize a problem-based, integrated approach where students work through problem sets of interleaved topics, rather than a traditional textbook. BUA faculty are also involved outside the classroom in a variety of ways, including advising, chaperoning trips and events, and leading extracurricular activities.

The ideal candidate will have the following qualifications:

- Bachelor's degree in math, math education, or a related field; Master's Degree or higher preferred
- 3+ years of experience teaching math, preferably at a high school level; college teaching experience will also be considered
- Experience working with high-school students and a passion for supporting students at this level
- A student-centered orientation
- Deep content knowledge and a passion for the material
- Experience in a problem-based approach to math education

The teacher will join a five-person department committed to inquiry-based approaches and student-centered teaching and learning math.

Experience in or knowledge of independent schools is a plus. For all positions, we look for candidates who enjoy working with colleagues in a collaborative environment, who are flexible and creative, who will fully engage in the life of the school, and who are committed to fostering an inclusive and equitable community.

As the only high school in New England that is part of a major research university, Boston University Academy (BUA) offers students who love learning both a traditional, caring independent school experience and access to a broad range of university courses. In the eleventh and twelfth grades, students follow their passions by regularly completing up to twelve courses from Boston University's undergraduate curriculum. The school's 242 students are curious, capable, and kind. They come from 47 cities and towns in the Greater Boston area. 53% of students identify as students of color. 29% of students are on financial aid — a reflection of BUA's commitment to equity and access.

For details on benefits, please refer to the Boston University benefits page [here](#).

To apply, please send a resume, list of references (if available), and cover letter addressed to Dr. Rosemary White, Associate Head of School, to buacareers@bu.edu.
